The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/589,610	<b>Applicant(s)</b> KOBAYAKAWA ET AL.	
	<b>Examiner</b> Ngan Ngo	<b>Art Unit</b> 2818	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The amendment filed February 1, 2008 has been entered and made of record as paper no. 0208.

Applicant's election without traverse of claims 1-23 in the reply filed on February 1, 2008 is acknowledged.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamada (US 2003/0151044 A1) in view of Nagahama et al (US 6,172,382 B1).

Yamada discloses a gallium nitride compound semiconductor multilayer structure comprising a substrate (201), and an n-type layer (204), a light-emitting layer (206), and a p-type layer (211) formed on the substrate; the light-emitting layer having a multiple quantum well structure in which a well layer (108) and a barrier layer (107) are alternately stacked repeatedly, said light-emitting layer being sandwiched by the n-type layer (204) and the p-type layer (211), wherein the well layer comprises a thick portion and a thin portion. See figure 6 of Yamada. Nagahama further discloses that barrier layer can contain a dopant. Note lines 63-65, column 21 of Nagahama.

Therefore, it would have been obvious to one of ordinary skill in the art to dope the barrier layers in Yamada's device as taught by Nagahama.

The other references are cited to show other structures pertinent to Applicants' disclosure.
